

Problem Sheet 3

Submission Deadline: 17.12.2007

1 Problem

Conduct a user study according to your experiment design description from problem sheet no. 2. In order to derive results, examine your collected data with appropriate methods. Summarize all your findings and provide a detailed description of your experiments in a concise report. The report has to contain all important information that allow others to follow your experiment and your derived results.

10 Points

Note: The submission of problem sheets has to be done by e-mail to hwitt@tzi.de with the following subject:

[Lecture Wearable Computing] Problem Sheet No.{number}. If problems require the implementation of software it has to be submitted along with the problem sheet containing documented source code, compiled binaries, and 2 small scripts (for Windows and Linux) to run the application.
